Professional Experience

April 2022 - April 2025	DLSMHSI	Web Developer & Consultant

As a website consultant, I understand their business goals and target audience, and then develop a website that meets their needs. I also provide support and maintenance for their existing websites.

Key Responsibilities:
- Build websites using WordPress and Web Apps using MVC Frameworks
- Develop a website brief that outlines the website's goals, target audience, and functionality.
- Develop a content strategy for the website.
- Select a website development platform and tools.
- Create a website design that is user-friendly and visually appealing.
- Ensure that the website is consistent with the client's brand.
- Monitor the website's performance and make updates as needed.
- Fix any bugs or glitches that occur on the website.
- Keep the website's content up-to-date.
- Communicate with clients and process owners.

Tech Stack:
PHP, WordPress, CodeIgniter, HTML, CSS, JS, MySQL, MSSQL, Git, Bitbucket, Jira

October 2021 - April 2022	Lamudi Philippines	Web Developer

As a web developer, I'm responsible for creating and maintaining websites that are not only visually appealing but also functional and user-friendly. I experience a wide range of tasks, from translating design concepts into code to ensuring website security and performance.

Key Responsibilities:
- Build websites using BOLT CMS and Deploy to AWS S3
- Collaborating with Designers
- Creating Dynamic Web Pages
- Integrating Third-party Tools
- SSL Installation
- Implementing New Features and Updates
- Communicating Effectively
- Working with Project Managers

Tech Stack:
PHP, Symfony, BOLT, HTML, CSS, JS, MySQL, MSSQL, Git, Bitbucket, Jira, Slack, AWS S3

September 2019 - September 2021	DLSMHSI	PHP Developer (Full Stack)

As a sole web developer, I need to have a strong understanding of front-end and backend development and the ability to work independently. It's quite overwhelming and challenging but also rewarding. I tend to learn to set realistic expectations, prioritize tasks, and take advantage of online resources.

Key Responsibilities:
- Build websites using WordPress and Web Apps using MVC Frameworks
- Build website and web application based on client needs
- Collaborate with different departments to understand business goals and requirements.
- Write and maintain website documentation.
- Design, develop, and maintain websites that are visually appealing, functional, and user-friendly.
- Develop useful web applications
- Optimize websites for search engines to improve visibility and organic traffic.
- Troubleshoot and fix website bugs and glitches.

Tech Stack:
PHP, WordPress, CodeIgniter, HTML, CSS, JS, MySQL, MSSQL, Git, Bitbucket, Jira

Sept 2018 - Aug 2019	Project-based	Web Developer

As a project-based web developer, I need to have a strong understanding of website development and the ability to work independently.

Key Responsibilities:
- Build websites using WordPress
- Consult with clients to understand their business goals and target audience.
- Develop a website plan that outlines the website's development timeline and budget.
- Deploy websites to a live server.
- Provide technical support to clients.
.
Tech Stack:
PHP, WordPress, CodeIgniter, HTML, CSS, JS, MySQL, MSSQL, Git, Bitbucket, Jira

June 2018 - August 2018	Leadgenda	Junior Software Engineer

As a junior .Net software engineer, I need to have a strong understanding of c# and asp.net language. Deliver quality websites to U.S clients.

Key Responsibilities:
- Build websites using .net framework
- Consult with clients to understand their business goals and target audience.
- Develop a website plan that outlines the website's development timeline and budget.
- Deploy websites to a microsoft web server (IIS).
- Provide technical support to clients.

Tech Stack:
C#, Asp.net, HTML, CSS, JS, MSSQL, IIS

August 2017 - May 2018	Linear Value Consulting Group	Junior .Net Developer

As a junior .Net Developer, I handle an in-house web application system. It is used for the production line in one of our client company.

Key Responsibilities:
- Troubleshoot and fix wep app bugs and glitches.
- Regular maintenance.
- Collaborate with Senior Devs
- Deploy websites to a microsoft web server (IIS).
- Provide technical support to clients.

Tech Stack: C#, Asp.net, HTML, CSS, JS, MSSQL, IIS, TFS

July 2016 - July 2017	DLSMHSI	PHP Developer (Full Stack)

As a junior web developer, I need to be efficient grow in a fast-paced environment, and have the ability to work with senior developers. As my first career job, It's quite overwhelming and challenging but also rewarding. I tend to learn from my senior colleagues.

Key Responsibilities:
- Help to build websites using WordPress and Web Apps using MVC Frameworks
- Collaborate with different departments to understand business goals and requirements.
- Create website documentation.
- Help in designing visually appealing, functional, and user-friendly.

Tech Stack:
PHP, WordPress, CodeIgniter, HTML, CSS, JS, MySQL, MSSQL, Git, Bitbucket, Jira

Main Projects

Find Your Doctor

- Easy access to doctor's clinic schedules. Search by consultant's name, or HMO/CAAP Accreditation

Institutional Website

- This is an institutional website mainly composed of (Hospitals, Academics, and Research).

Accounting System

- It is a system with a structured process for managing tenant financial transactions which involves tracking occupancy and expenses in running a dormitory. There is a process of generating and managing rent bills based on the lease agreement. The payment processing allows tenants to make payments through various payment methods.

Online Enrollment System

- It is a portal intended to manage user-friendly enrollment and payment processes of the student. This will enable the school admission and finance department to efficiently manage school transactions like downpayment for tuition fees and school requirement purchases like books, uniforms, etc. By having the system, the monitoring of reports can be done accurately and efficiently.

COVID Lab Result Checker

- It is a digital tool designed to encode, approve, generate, and verify Covid laboratory results. Its crucial role is to provide individuals with timely and secure access to their Covid-19 test results that's why a QR code is required upon verification. It will help them make informed decisions regarding their health and safety.

Individual Projects

Raspberry Pi (Retro Pie)

- Being a 90's kid in the Philippines I was able to experience playing arcade games. After I graduated from college I started learning new things and one of them was Raspberry Pi. I use RetroPie to turn the Raspberry Pi into a retro gaming console.

Attendance Monitoring with biometrics (Arduino)

- Having a liking for microcontrollers I started a fun project using Arduino board to create an attendance monitoring system with RFID and Fingerprint scanners. C++ is used in running the Arduino and I use vb.net for the interface.

Seminars / Conference Attended

Word Camp Manila 2023

- WordCamp is a conference that focuses on everything WordPress. This is my first community-organized event. I'm able to meet fellow developers, publishers, business owners and tech companies coming from different countries. As a wordpress developer I feel really inspired and thankful for the amazing learning and networking experience that this event brings.
